

CHICAGO DATA CENTER (CHI-3)

About CHI-3

SingleHop’s newest data center in the Chicago area is situated in a private, secured campus built and operated by Digital Reality Trust. SingleHop holds a single-tenant, 10-year lease for a private data center suite, private network operations and staging environment. SingleHop operates its own on-site network operations center. Facility has a maximum capacity of 30,000+ servers. SingleHop has on-site expansion rights on additional adjacent space.
